DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Kashiwara et al.(USPN 4571688).

Kashiwara teaches a wire bonder comprising a bondhead, a power supply for driving the bondhead, switches for controlling the power supply and control program which produce a signal and a timer (clock) (col 2 line 56 – col 3 line 32 and col 5 line 19 – col 7 line 16).

Response to Arguments

3. Applicant's arguments with respect to claim 1 has been considered but are moot in view of the new ground(s) of rejection.

Allowable Subject Matter

4. Claims 2-24 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Haji (USPN 6093904, vacuum sensor), Narita et al.
